FEATURES

- Completely adjustable and expandable to fit most AC units for commercial and residential units
- Cages adjust to inside dimensions of 30"-48"W, 30"-48"D, and 34"-59"H.
- Unit is powder coated for durable long lasting investment
- Both adjustable and fixed cage options available

AC Unit Protection

APPLICATION

- Protects HVAC units from theft and unwanted access
- Keep units secure and safeguarded from physical damage

RECOMMENDED FOR

- Commercial and residential applications
- Both unitary and mini-split units
- Mounted to concrete pad or installed with ground anchors

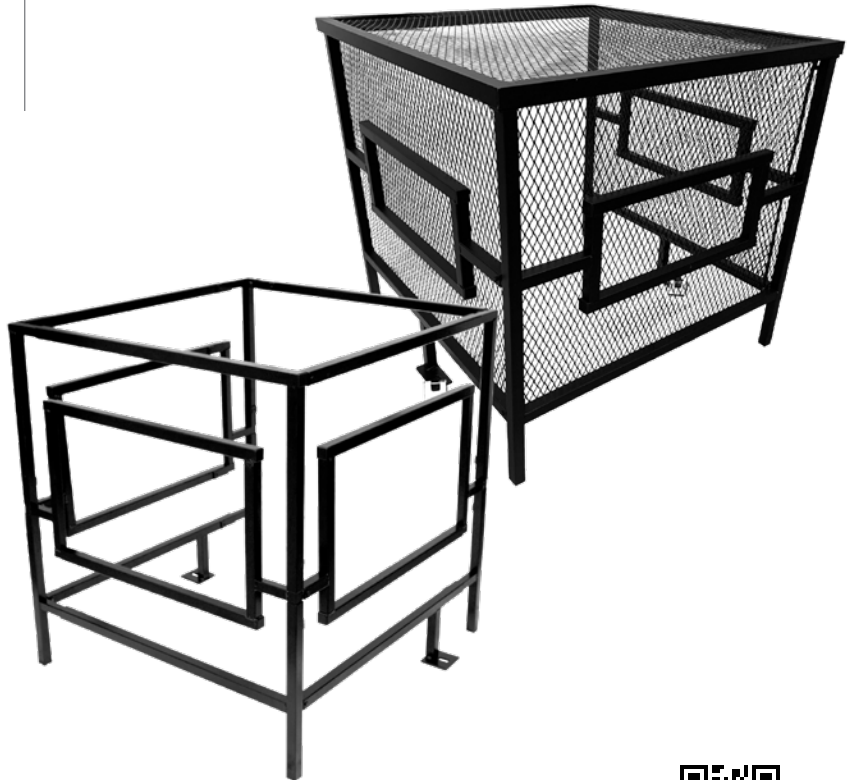

For concrete pad application, recommend to use Tapcon ¼" x 2¼" Phillips countersunk #24585. When inadequate pad clearance is an issue, consider two lock locations on either side of the pad. Dig holes to fill with Sakcrete mix and water before mounting foot brackets securely onto the filled liquid concrete.
