

8 inch Heat Pump Pad

Product Heat Pump Pad

Purpose The DiversiTech Heat Pump Pad provides an effective base for heat pump equipment installed in snowy climates. Rather than a combination of a typical 2 inch (or 3 inch) equipment pad and 6 inch heat pump risers, the Heat Pump Pad provides a full 8 inch of elevation in a simple square footprint. The star pattern of the integral risers allows for installation of equipment with different size footprints up to 36 inch X 36 inch.

- Features**
- Include 8 anti-vibration pads uniquely designed to fit into the guide slots on the top of the risers.
 - The base is sloped outward to allow for easy drainage of condensate or defrost cycle condensate when the outdoor coil is operating in heat pump mode.
 - Nestable for efficient shipping, transportation, and warehousing.
 - Environmentally friendly

- General Specifications**
- Injection molded
 - Made from recycled polypropylene material
 - Drillable
 - UV Resistant
 - Load Capacity:
HP3232-8: 307 lbs
HP3636-8: 389 lbs

General Characteristics

Stock Number	Dimensions	Number per Pallet	Weight
HP3232-8	32 in x 32 in x 8 in	16	18 lbs
HP3636-8	36 in x 36 in x 8 in	16	18 lbs
